Escrow done better

OUR SECURE ESCROW SOLUTIONS MANAGE THE EFFICIENT TRANSFER OF FUNDS FOR CORPORATE AND PRIVATE TRANSACTIONS.

INTERPOLITAN

01

A NEW GENERATION OF INNOVATIVE ALTERNATIVE SOLUTIONS

About us

Interpolitan Money makes premium alternative banking a reality. Nestled in the space between conventional private banking and financial technology, we empower clients, helping them navigate an increasingly complex global financial landscape.

Private Clients

Our private accounts are ideal for clients with unique international banking challenges, helping them invest abroad, pay for medical care and buy property overseas.

Corporate

We work with international businesses of various types, some of which have complex structures or frameworks that make conventional banking services difficult to access.

Funds & Institutions

We support financial institutions of all sizes across funds and asset classes, offering an alternative to traditional international banking. Our clients work in alternative investments, debt, private equity, real estate and infrastructure.

Non-Resident

Opening a traditional non-resident bank account can be difficult and time consuming. An Interpolitan account can make your financial life easier so you can focus on what really matters.

02

MODERN & TRUSTED

Comprehensive escrow solutions

Escrow services

We act as an independent, trusted intermediary, holding funds securely until all conditions of a deal are met. Our solutions are ideal for various scenarios, including litigation, real estate transactions, construction projects, investments and M&A.

Paying agent services

Our paying agent services ensure that funds are distributed in an accurate and timely way. We tailor solutions for high-value transactions, including legal settlements and corporate payouts, and provide transparent tracking and reporting throughout the process.

TPMA/Client money account

Third-party managed accounts (TPMAs) are secure, FCA-regulated accounts that help law firms and other organisations reduce risk when handling client funds. Deposits are kept in client-specific safeguarding accounts to ensure regulatory compliance.

03

OUR SERVICES

How escrow works

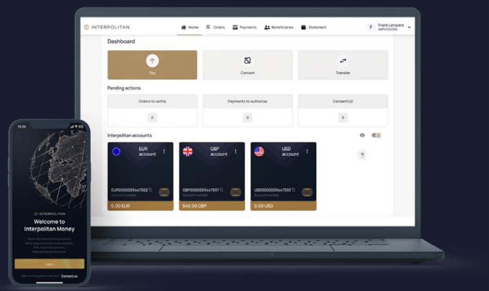
1. Agreement
A new escrow agreement outlines the terms and conditions under which Interpolitan will hold and release funds.

2. Verification
We complete KYC and due diligence for all parties involved, including the law firm.

3. Account
We open a client-specific account to safeguard all funds deposited during the escrow process.

4. Hold
After a deposit is made, we issue a receipt and hold funds securely for the duration of the escrow agreement.

5. Disperse
When all conditions have been fulfilled, we distribute funds to beneficiaries in line with the agreed payment schedule.



WHO WE WORK WITH:

- Law firms
- Corporate service providers
- Investment managers
- Private clients
- Fiduciary firms
- Family offices
- Professional services
- Consultancies
